Dhaka, Bangladesh.

Subject: Financial Proposal for Odoo ERP Implementation for M/S TEX WEAR FASHION

Dear Sir,

Thank you for providing us with the opportunity to submit our Financial Proposal for the implementation of the Odoo ERP solution for **M/S TEX WEAR FASHION**.

ZENCORE SOLUTIONS LIMITED, an Official Odoo Silver Partner, is committed to delivering enterprise-grade ERP solutions that help organizations streamline operations, improve efficiency, and support sustainable business growth. With extensive experience in Odoo implementation across various industries, we strive to provide solutions that align with our clients' business objectives while ensuring long-term value.

This financial proposal presents our commercial offer for the proposed Odoo ERP implementation, including the pricing for software licenses, implementation services, and other applicable commercial components. The proposal has been prepared based on our current understanding of your requirements and the discussions held with your team.

We appreciate your consideration of our proposal and look forward to the opportunity to work with your organization. Should you require any clarification or additional information regarding this proposal, please do not hesitate to contact us.

Thank you for your time and consideration.

Yours sincerely,
Fahad Bin Aziz
Business Development Executive
ZENCORE SOLUTIONS LIMITED
A Sister Concern of BETOPIA GROUP

1. ZENCORE SOLUTIONS LIMITED'S OVERVIEW

1.1 Company Profile

Established as the dedicated ERP and business solutions concern of **BETOPIA GROUP**, **ZENCORE SOLUTIONS LIMITED** combines years of technology expertise with a steadfast commitment to digital transformation, operational excellence, and business process optimization.

Backed by an experienced leadership team that has been delivering technology solutions **since 2014**, **ZENCORE SOLUTIONS LIMITED** was established to provide specialized Odoo ERP consulting, business analysis, implementation, customization, integration, training and knowledge transfer, as well as long-term support and maintenance services for organizations across diverse industries.

BETOPIA GROUP is a rapidly growing technology ecosystem comprising **22+ business units** across six core domains, powered by innovation, artificial intelligence (AI), and strategic integration. With more than 14 years of industry experience, the Group has successfully delivered over 85,000 projects and served more than 65,000 clients across 80+ countries worldwide. Supported by a global workforce of over 5,000 professionals and generating approximately USD 3.5 million in monthly revenue, **BETOPIA GROUP** provides **ZENCORE SOLUTIONS LIMITED** with a strong foundation of scalability, resource depth, operational excellence, and long-term business sustainability.

Through its global operations and business interests, **BETOPIA GROUP** maintains a presence across **Bangladesh**, the **USA**, the **UK**, the **UAE**, **Australia**, and the **Philippines**, serving clients worldwide through a unified, high-performance technology ecosystem.

ZENCORE SOLUTIONS LIMITED supports organizations of all sizes, from *fast-growing startups* to *large, well-established enterprises*, across industries including manufacturing, garments and textiles, chemical, leather, agro, retail, restaurants, distribution, construction, education, healthcare, logistics, power and energy, financial services, telecommunications, and e-commerce.

As a specialized **Odoo ERP** solutions provider, **ZENCORE SOLUTIONS LIMITED** follows a structured implementation methodology encompassing business analysis, solution design, system configuration, customization, integration, testing, deployment, user training and knowledge transfer, User Acceptance Testing (UAT), change management, and post-go-live support and maintenance services. Our objective is to help organizations adopt industry best practices, streamline operations, enhance visibility, improve decision-making, strengthen governance, and achieve sustainable growth through technology.

For complex and enterprise-grade projects, **ZENCORE SOLUTIONS LIMITED** maintains a dedicated team of **certified Odoo professionals**, including Project Managers, Business Analysts, Functional Consultants, Solution Architects, Technical Consultants, and Developers. Our team delivers end-to-end solutions tailored to each

client's unique operational requirements. Through flexible onsite and offshore delivery models, dedicated support services, and continuous system optimization, we ensure long-term value from every ERP investment.

Our team of consultants and developers possesses unparalleled technical expertise in Odoo. With a strong focus on delivering exceptional customer experiences, we enable you to fully harness the potential of Odoo ERP through

1. Odoo Consulting

- Detailed analysis of business processes and requirements
- Identification of industry best practices
- Strategic guidance to implement Odoo with minimal customization

2. Odoo Implementation

- End-to-end implementation from planning to go-live
- Seamless data migration, system configuration, and rollout
- Comprehensive user training for effective adoption

3. Odoo Integration

- API-based integration with third-party applications and legacy systems
- Integration with payment gateways, logistics providers, POS, and other platforms
- Ensuring workflow automation and consistent data flow

4. Odoo Customization

- Development of custom modules and advanced features
- Tailor-made workflows, analytical dashboards, and business reports
- Enhancements to align Odoo with unique business requirements

5. Odoo Support & Maintenance

- Dedicated technical and functional support
- System monitoring, optimization, and ongoing maintenance
- Continuous enhancement to support evolving business needs

2. PROJECT SCOPE & SOLUTION DESCRIPTION

2.1 Modules and Features

The **Odoo modules to be implemented** will be selected based on the client's business requirements, operational processes, and integration needs. Each module can be configured or customized as necessary to support workflows:

Modules	Description
Merchandising & Costing Sheet Approval	• Costing Sheet Creation: Prepare detailed costing sheets for each style/order, including fabric, trims, accessories, and CM (Cost of Making). • Multi-Level Approval Workflow: Configurable approval hierarchy (Merchandiser → Manager → Management) before a costing sheet is finalized. • Buyer-Wise Costing Templates: Maintain separate costing formats and rate structures for different buyers. • Fabric & Trim Cost Breakdown: Track consumption and cost of fabric, trims, and accessories per style for accurate costing. • CM (Cost of Making) Calculation: Auto-calculate making charges based on operation breakdown, SMV, and labor rate. • Version Control & Revision History: Track changes to costing sheets across revisions with full audit trail. • Profit Margin & Costing Analysis: Automatically calculate estimated profit margin against buyer's quoted price. • Comparison with Actual Cost: Compare approved costing against actual production cost for variance analysis. • Style-Wise & Order-Wise Tracking: Link costing sheets to specific styles, orders, and buyer POs for traceability. • Approval Status Notifications: Automated alerts to relevant approvers when a costing sheet is pending review. • Currency & Exchange Rate Support: Handle costing in multiple currencies for international buyers. • Integration with Sales Order: Auto-pull approved costing into sales order/quotation for consistency.
Sales Management	• Order Management: Track and manage customer orders from booking to shipment. • Quotation & Invoice Management: Generate and convert quotations to sales orders, then generate invoices. • Multi-Currency Support: Handle sales transactions in different currencies, especially for international buyers. • Buyer-Wise Profitability Tracking: Track profitability per buyer, considering margins and costs. • Sales Order Tracking: Track status of orders from booking to production and shipment. • Automated Lead Assignment: Automatically assign leads to the right sales personnel or team. • Sales Analytics: Real-time reporting on sales performance, order progress, and buyer-specific details. • Discount & Promotion Rules: Define and apply discounts or promotions automatically based on conditions.

	• Delivery & Invoice Address Handling: Manage multiple address types for delivery and invoicing purposes. • Quotation Templates: Create reusable templates for sales quotes.
Requisition & Purchase Management	• RFQ Management: Manage Requests for Quotations and easily convert them into Purchase Orders (PO). • Purchase Order Management: Automate PO creation, track order status, and ensure timely delivery from suppliers. • Vendor Bills Management: Handle vendor invoices, track payments, and manage accounts payable. • Supplier Lead Time Management: Monitor and track lead times for suppliers to avoid delays in production. • Multi-Company Support: Manage purchases across different business entities or departments. • Multi-Currency Support: Handle purchase orders and payments in multiple currencies for international suppliers. • Vendor Relationship Management: Maintain and track supplier relationships, contracts, and pricing agreements. • Purchase Analytics: Monitor supplier performance, costs, and material consumption. • Order Tracking: Track orders through all stages, from requisition to supplier payment. • Product Sourcing: Automatically select suppliers based on stock availability, pricing, and lead times.
Inventory Management	• Multi-Warehouse Management: Manage inventory across multiple warehouses with real-time stock tracking. • Barcode & Lot Tracking: Use barcode scanning for inventory tracking and manage stock by lot for traceability. • Real-Time Stock Updates: Get instant updates on stock levels, movements, and material consumption. • Inventory Forecasting: Predict future inventory needs based on historical data and production requirements. • Inventory Valuation: Calculate and track the value of inventory for financial reporting. • Product Categorization: Categorize products for better inventory management, including raw materials and finished goods. • Stock Movement Tracking: Monitor stock movements between warehouses and track material usage during production. • Inventory Adjustments: Make real-time adjustments for stock discrepancies and process stock returns. • Automated Stock Replenishment: Set rules to automatically reorder products when stock levels reach a minimum threshold. • Inventory Analytics: Real-time reporting on stock levels, consumption trends, and re-ordering needs.
Manufacturing Management	• Production Planning: Automate and streamline production scheduling, allocating resources efficiently across production lines. Integrate a Time and Action Calendar (TNA) to ensure all production activities are completed on time. • TNA Integration: Implement a Time and Action Calendar to monitor key production milestones, deadlines, and dependencies across both production plants. • Work-Center & Line-Wise Tracking: Track production progress at every work center and line to optimize production flow, capacity utilization, and identify bottlenecks.

	• Bill of Materials (BOM): Create detailed BOMs for each style, including fabric, trims, labor, and overheads. Track costs at the BOM level to calculate exact product costs. • Production Orders: Generate and manage production orders automatically from sales orders, ensuring seamless production planning and timely execution. • Material Consumption Tracking: Track the consumption of materials during production to ensure efficient use and prevent wastage. • Production Downtime Monitoring: Record and monitor downtime across production lines to improve overall efficiency and minimize production delays. • Capacity Planning: Ensure that machine and labor resources are optimally utilized, with the ability to handle changes in production schedules. • Quality Control (QC) Integration: Implement quality checks and inspections at key stages of production (inline, end-line, and final inspections), integrated directly into the manufacturing process. • Work-in-Progress (WIP) Tracking: Monitor the WIP at each stage of production, ensuring accurate tracking and reducing delays caused by material or process issues. • Finished Goods Inventory: Automatically update the inventory when finished goods are produced, reducing manual entry and ensuring real-time stock updates. • Batch/Lot Tracking: Track products through each stage of production using batch or lot numbers, ensuring traceability and meeting quality standards. • Production Costing: Track costs associated with production, including labor, raw materials, and overhead, to calculate product costs accurately. • Order Completion and Shipment: Seamlessly integrate the completion of manufacturing orders with the shipment process, ensuring timely deliveries to customers. • Subcontracting Management: Manage subcontracting tasks, including sub-contractor performance, materials issued, quality checks, and costs. This will integrate with BOM (for manufacturing, kit, and subcontract) to ensure smooth processes and accurate costing. • Automation via IoT/API Integration: Integrate IoT devices and API-based automation for real-time tracking and monitoring of machine performance, ensuring efficient production cycles. This will allow for automatic adjustments to production schedules, real-time machine status updates, and better control over production efficiency, reducing manual intervention.
Quality Control (QC) Management (at every step of production)	• Defect Tracking: Track and report defects across production stages, from raw materials to finished products. • Quality Inspection: Define quality checkpoints during production, including inline, end-line, and final inspections. • Audit-Ready Documentation: Maintain quality records and compliance documents for audits. • Quality KPI Monitoring: Track key performance indicators (KPIs) related to product quality, such as defect rates and rework costs. • Rework Management: Manage and track rework processes, including defect resolution and cost implications. • Supplier Quality Management: Monitor and evaluate the quality performance of suppliers and take corrective actions when necessary. • Compliance Management: Ensure compliance with buyer-specific quality standards and international regulations. • Quality Data Integration: Integrate quality control data into the ERP system for seamless analysis and reporting. • Inspection Scheduling: Schedule and track inspections at various stages of production.

	• Real-Time Quality Reporting: Generate real-time quality reports for management to track quality trends and make informed decisions.
Finance & Accounting Management	• Automated Journal Entries: Automatically generate journal entries from sales, purchases, and other financial transactions. • Smart Bank Reconciliation: Reconcile bank accounts by matching bank statements with accounting entries. • Multi-Currency Support: Handle multiple currencies for international transactions. • Customer Invoicing: Generate and send invoices to customers, linked to sales orders. • Vendor Bills Management: Manage vendor invoices and payments for raw materials and services. • Payment Matching: Automatically match payments with invoices and bills for accurate financial tracking. • Financial Reporting: Generate essential financial reports, including Profit & Loss, Balance Sheets, and Cash Flow. • Tax Configuration & Auto Tax Calculation: Setup taxes based on regions and automatically calculate taxes for transactions. • Fixed Asset Depreciation Management: Track and manage asset depreciation for financial reporting. • Credit Notes & Refunds: Manage credit notes and process refunds for customers or vendors. • Budget Management: Track and manage budgets across departments and ensure financial control. This includes forecasting, budget comparison, and budget variance analysis.
Employee Management	• Employee Profiles: Maintain detailed records of employees, including personal data, roles, and history. • Employee Performance Tracking: Monitor performance, training needs, and appraisals. • HR Analytics: Provide data on employee productivity and effectiveness. • Employee Benefits Management: Track and manage employee benefits like health insurance, allowances, etc. • Payroll Integration: Integrate employee data with payroll for automated salary processing, including bonuses and deductions. • Employee Self-Service Portal: Allow employees to access their data, such as payslips, leave requests, and performance reviews. • Employee Onboarding & Exit: Manage the onboarding process for new employees and exit process for employees leaving the company.
Recruitment Management	• Job Requisition Management: Automate the creation and approval of job requisitions for different departments. • Candidate Sourcing: Manage sourcing channels such as job boards, LinkedIn, internal referrals, and recruitment agencies. • Applicant Tracking System (ATS): Track candidates through each stage, from application to selection. • Resume Parsing & Candidate Profiles: Automatically parse resumes and create detailed candidate profiles. • Interview Scheduling: Integrate with calendars to automate interview scheduling between recruiters, hiring managers, and candidates. • Candidate Assessment: Evaluate candidates with skills tests, psychometric evaluations, and personality assessments. • Offer Letter Generation: Generate offer letters for selected candidates, detailing salary, benefits, and other terms of employment.

	• Onboarding Integration: Seamlessly integrate the recruitment process with the Employee Management module for smooth onboarding. • Recruitment Analytics: Generate reports on recruitment metrics such as time-to-hire, source effectiveness, and recruitment costs. • Candidate Communication: Automate communication with candidates regarding application status, interview schedules, etc. • Compliance & Documentation: Maintain compliance with local labor laws by securely storing candidate communication and documentation.
Attendance Management	• Biometric Integration: Integrate biometric systems for accurate employee attendance tracking. • Overtime Management: Track and approve overtime hours for employees. • Leave Management: Manage leave requests and ensure real-time tracking of employee leave balances. • Absenteeism Tracking: Monitor and report absenteeism, and take corrective actions as needed. • Real-Time Attendance Reporting: Provide managers with real-time attendance data for better decision-making. • Automated Payroll Integration: Automatically generate payroll based on employee attendance, overtime, and leave data.
Time-Off (Leave) Management	• Leave Management: Manage and approve employee leave requests, track leave balances, and automate leave approval workflows. • Public Holidays Integration: Automatically account for public holidays in the leave system, ensuring accurate leave balance calculations. • Sick Leave & Casual Leave: Track and manage different types of leave, including sick leave and casual leave, with customizable policies. • Leave Approvals: Automate leave approval workflows, including manager approvals and notifications to HR. • Time-Off Request Notifications: Notify managers and employees about leave status (approved, pending, or rejected). • Leave Accruals: Automatically calculate leave accruals based on company policies (e.g., per month or annual leave). • Integration with Payroll: Automatically adjust payroll calculations based on approved leave, ensuring accurate pay processing. • Time-Off Reports: Generate reports on employee time-off usage, leave balances, and trends over time. • Employee Self-Service Portal: Allow employees to apply for and track their leave requests through a user-friendly portal.
Payroll Management	• Automated Payroll Processing: Calculate and process employee salaries automatically, including taxes, bonuses, and deductions. • Overtime Management: Track and manage overtime hours worked by employees, and ensure accurate overtime pay. • Payroll Tax Calculations: Automatically calculate and withhold taxes based on employee income, including VAT and local tax regulations. • Benefit Management: Track and manage employee benefits, including health insurance, allowances, and retirement plans. • Payslips Generation: Automatically generate and send detailed payslips to employees, including breakdowns of salary components. • Compliance with Labor Laws: Ensure payroll calculations comply with local labor laws, including overtime rates, minimum wage laws, and mandatory deductions. • Multi-Currency Payroll: Support multi-currency payroll processing for international employees and cross-border operations.

	• Bonus and Commission Management: Calculate and process bonuses and commissions based on predefined performance metrics or sales targets. • Payroll Integration with Attendance: Integrate attendance data (including leave, overtime, and absence) directly with payroll processing for accurate salary calculation. • Year-End Reports: Generate year-end payroll reports for tax filing, financial audits, and employee record-keeping.
Dashboard Management	• Real-Time Data Monitoring: Provide up-to-date data across all departments, including sales, inventory, and finance. • Customizable Dashboards: Allow users to create dashboards that display key performance indicators (KPIs) relevant to their role. • KPIs & Metrics Tracking: Monitor metrics such as sales, expenses, inventory levels, and production efficiency. • Interactive Reports: Generate drillable reports with interactive data visualizations. • Alerts & Notifications: Set up alerts for key events, like low inventory or overdue payments, to prompt action. • Executive & Department Views: Allow different user levels to see high-level KPIs or detailed departmental data. • Data Export: Export data from the dashboard to Excel or PDF formats for analysis. • Multi-Department Integration: Integrate data from various departments, like sales, manufacturing, and HR, into a single dashboard. • User Access Control: Control who has access to specific dashboards or data based on their role. • Data Accuracy & Consistency: Ensure that data shown on the dashboard is accurate and up-to-date in real time.

IMPORTANT NOTE:

In addition to the modules listed above, the implementation includes the standard Odoo core applications and system components required to support the proposed solution. These include, but are not limited to, **Contacts, Discuss, Calendar, Activities (To-Do), user and access management, notification services**, and other platform dependencies necessary for the operation of the implemented modules. Where applicable, supporting applications such as **Barcode** will be configured as part of the relevant module implementation (e.g., Asset or Inventory Management) and are included within the implementation scope without being quoted as separate line items.

2.2 IMPLEMENTATION STRATEGY

2.2.1 Methodology

The ERP implementation will follow a structured, phased, and Agile-driven methodology aligned with industry best practices to ensure controlled delivery, effective stakeholder engagement, user adoption, and long-term system stability. This approach enables **ZENCORE SOLUTIONS LIMITED** to manage the project through clear implementation stages while maintaining the flexibility to accommodate evolving business requirements in a controlled manner.

Unlike a rigid sequential model, the proposed methodology emphasizes iterative validation, continuous feedback, and close collaboration between the implementation team and the client's key stakeholders. This ensures that business requirements are accurately translated into system configuration and development outcomes, while minimizing implementation risk and reducing gaps between expected and delivered functionality.

1. Requirement Analysis

Following **work order confirmation and project kick-off**, detailed requirement analysis sessions will be conducted with stakeholders across all relevant departments. These sessions will include business process walkthroughs, review of current practices, data assessment, and validation of operational workflows to establish a complete understanding of the existing business environment and target expectations.

Based on these findings, the Business Analysis team will prepare the Software Requirement Specification (SRS), which will define the approved functional scope, process flows, reporting expectations, configuration approach, and identified development requirements.

2. Solution Design and Development

Based on the approved requirements and solution design, the development and configuration activities will be carried out under the guidance of the Business Analysis team. The implementation will follow an iterative approach, allowing continuous validation of configurations, developments, and process logic throughout the project lifecycle.

Regular communication with the client's key users will be maintained during this phase to ensure alignment, validate intermediate outputs, and address feedback in a timely manner. This collaborative approach helps improve implementation quality, reduces ambiguity, and allows controlled adjustments where required.

3. Testing, Deployment, and User Validation

Once the configuration and development activities are completed, the solution will be prepared for deployment in the appropriate environment. This phase will include system setup, master data preparation, data migration support, and end-to-end validation of configured workflows.

User Acceptance Testing (UAT) will be conducted using real business scenarios and sample operational data provided by the client's key users. This step is essential to confirm that the system performs in accordance with the approved requirements and is ready for operational use.

4. Training and Knowledge Transfer

Upon successful completion of UAT, ZENCORE SOLUTIONS LIMITED will conduct training sessions for the designated key users of each functional area. The objective of this training is to ensure that key users are fully capable of operating the system, supporting internal adoption, and transferring practical knowledge to end users within their respective departments.

This train-the-trainer approach supports sustainable adoption and helps the organization build internal capability for day-to-day ERP operations.

5. Go-Live and Stabilization Support

Upon successful completion of UAT and user readiness confirmation, the system will be transitioned to live operation. A **defined stabilization support period** will be provided to ensure the system operates smoothly. Support includes:

- Ensuring Odoo functions as expected
- Assisting users during the early adoption phase
- Verifying that all accounting, inventory, and operational reports are generated correctly

2.2.2 Project Timeline

The timeline presented below reflects the proposed sequencing of activities and the estimated duration of each implementation phase. The schedule may be refined during the project initiation stage based on finalized requirements, resource availability, and organizational readiness.

ACTIVITY	PLAN START	PLAN DURATION	WEEK															
			1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
ERP	1	16																
Data Gathering	1	3																
Configuration	2	7																
Deployment	4	5																
Training	5	3																
UAT	6	2																
Go-Live	7	1																
Assistance	7	2																

3. PRICING & COMMERCIALS

3.1 YOUR INVESTMENT (ENTERPRISE)

Particular	Amount (BDT)
03 Licenses for 1st Year – Odoo Custom Version (\$130.80 × 03 Users = \$392.4) [Discounted price for first purchase]	49,050.00
Implementation & Custom Development Services • Merchandising & Costing Sheet Approval • Sales Management • Requisition & Purchase Management • Inventory Management • Manufacturing Management • Quality Control (QC) Management • Finance & Accounting Management • Dashboard Management • Human Resource Management ◦ Employee Management ◦ Recruitment Management ◦ Attendance Management ◦ Time-Off (Leave) Management ◦ Payroll Management	6,10,000.00
HOSTINGER KVM 4 200GB Server & Hosting with Daily Backup (\$323.88 for 1st Year)	40,485.00
Total Investment	699,535.00
Amount in Words: Bangladeshi Taka Six Lac Ninety-Nine Thousand Five Hundred Thirty-Five Only.	

☆ The pricing in this proposal has been calculated using an exchange rate of **USD 1 = BDT 125**.

☆ The applicable exchange rate shall be the **Sonali Bank B.C. rate** prevailing on the respective invoice date.

☆ The Odoo subscription licensing fees may be paid directly to **Odoo S.A.** by the Client, if preferred.

☆ **Annual Maintenance Contract (AMC)** charges shall be calculated at **20% of the implementation service value only** (excluding Odoo subscription licensing and hosting fees) and shall be **payable annually in advance**.

☆ **Dedicated complimentary support** will be provided for **30 calendar days following Go-Live**. Upon expiry of the complimentary support period, support services shall be governed by the agreed AMC or other applicable support arrangement.

3.2 YOUR INVESTMENT (COMMUNITY)

Particular	Amount (BDT)
Implementation & Custom Development Services - Merchandising & Costing Sheet Approval - Sales Management - Requisition & Purchase Management - Inventory Management - Manufacturing Management - Quality Control (QC) Management - Finance & Accounting Management - Dashboard Management - Human Resource Management - Employee Management - Recruitment Management - Attendance Management - Time-Off (Leave) Management - Payroll Management	5,50,000.00
HOSTINGER KVM 4 200GB Server & Hosting with Daily Backup (\$323.88 for 1st Year)	40,485.00
Total Investment	5,90,485.00
Amount in Words: Bangladeshi Taka Five Lac Ninety Thousand Four Hundred Eighty-Five Only.	

☆ Odoo Community Edition is **not user-licensed**, allowing you to use the system with **unlimited users** without additional per-user costs.

☆ The pricing in this proposal has been calculated using an exchange rate of **USD 1 = BDT 125**.

☆ The applicable exchange rate shall be the **Sonali Bank B.C. rate** prevailing on the respective invoice date.

☆ **Annual Maintenance Contract (AMC)** charges shall be calculated at **20% of the implementation service value only** (excluding Odoo subscription licensing and hosting fees) and shall be **payable annually in advance**.

☆ **Dedicated complimentary support** will be provided for **30 calendar days following Go-Live**. Upon expiry of the complimentary support period, support services shall be governed by the agreed AMC or other applicable support arrangement.

HOSTINGER Pricing

Category	1 st Year	2 nd Year	1 st + 2 nd Year
KVM 4 200GB with Daily Backup	Yearly (\$14.99 + \$12) *12 = \$323.88 Monthly 14.99 [This is 48.02% Discount on First Purchase]	Yearly (\$24.99 + \$12) *12 = \$443.88 Monthly 24.99 [No Discount]	Yearly (\$12.99 + \$12) *24 = \$599.76 Monthly 12.99 [This is 60.02% Discount on First Purchase]

Note: The HOSTINGER pricing shown above is based on the published subscription rates as of **19 July 2026**. Any future changes to HOSTINGER's pricing, plans, policies, or service availability shall be treated as an external dependency and may require a corresponding revision to this proposal.

3.3 Payment Terms

Terms	Details
Payment Schedule	Phase 1: Upon issuance of the Work Order 100% of the Odoo License fee (if applicable) and hosting fees, and 50% of the implementation service value.
	Phase 2: 30% of the implementation service value upon completion of the trial run and key-user training.
	Phase 3: Remaining 20% of the implementation service value upon successful Go-Live.
Payment Method	Payment may be made by Cash, Bank Transfer, or Account Payee Cheque.

3.4 Bank Details

The bank account details of ZENCORE SOLUTIONS LIMITED are as follows	
Bank Name	Dhaka Bank PLC
Account Title	Zencore Solutions Limited
Account No	2271000003794
Branch Name	Banasree Branch
Telephone	02 9857251, +880 17 3070 0964
SWIFT Code	BALBDDH003
Routing Number	085260728
Address	Nilachal, Plot No 14, Block B, Main Road, Banasree, Dhaka 1219.

4. General Terms & Conditions

- **Implementation of the proposed ERP solution will follow the standard framework**, architecture, and functional capabilities of the selected system edition unless otherwise specified in the agreed scope of work.
- All project **stakeholders are expected to provide timely input, approvals, decisions, and feedback** throughout the implementation lifecycle to ensure that the project progresses according to the planned schedule.
- The **Client will ensure the availability of the required IT infrastructure**, including hardware, network connectivity, internet access, system access permissions, and other technical resources necessary for implementation and operation.
- Any **additional infrastructure or third-party setup**, including but not limited to LAN, WAN, servers, workstations, cloud hosting, API access, biometric devices, IoT devices, SMS gateway, payment gateway, domain, email service, SSL certificate, or external integration service, **shall be the responsibility of the Client** unless separately contracted to ZENCORE SOLUTIONS LIMITED.
- The **Client will allocate dedicated key users, data owners, business representatives, technical contacts, and decision-makers** to participate in requirement discussions, process validation, data preparation, testing activities, training sessions, and go-live preparation.
- **All prices** quoted in this proposal **are exclusive of applicable VAT, taxes, duties, bank charges, payment gateway charges, and other statutory fees** unless otherwise expressly stated. Any such charges shall be borne by the Client in accordance with applicable laws, regulations, vendor policies, and the agreed commercial terms.
- **Odoo licensing, subscription fees, user charges, application availability, pricing policies, and related terms are governed by Odoo S.A.** or the respective authorized licensing authority. Any change in Odoo's licensing policy, subscription price, application structure, user pricing, hosting terms, or third-party service charges will be treated as an external dependency and may require revision of the commercial proposal where applicable.
- **Any third-party** software, hardware, hosting, cloud service, SMS gateway, payment gateway, biometric device, IoT device, API service, security certificate, domain, email service, or external integration cost will be **treated as the Client's responsibility** unless specifically included in the agreed scope and commercial offer.
- Any **integration with the Client's existing systems will depend on API availability**, database accessibility, data structure, vendor cooperation, technical documentation, system security policies, and the Client's approval. If additional development, middleware, API customization, or third-party vendor coordination is required, it may be treated as a separate scope item.
- **Any onsite visit**, implementation support, training, meeting, data collection, UAT support, or go-live assistance **outside Dhaka city** will require prior scheduling and approval. Unless otherwise included in the commercial offer, the **Client shall be responsible for all related travel, accommodation, food, local transportation, and other necessary logistical expenses** for ZENCORE SOLUTIONS LIMITED resources.
- **Project timelines are dependent on timely approval, user availability, data readiness, infrastructure readiness, requirement confirmation, and feedback from the Client.** Any delay in these dependencies may affect the overall project schedule and delivery timeline.

- **Post go-live support will commence immediately after system deployment** according to the agreed support arrangement, such as an Annual Maintenance Contract (AMC), Service Level Agreement (SLA), or other approved support agreement.
- **ZENCORE SOLUTIONS LIMITED reserves the right to revise, suspend, cancel, or withdraw any part of the proposal, service commitment, implementation schedule, or commercial arrangement with valid reason**, including but not limited to non-payment, major scope change, client-side delay, unavailability of required information, breach of agreed terms, change in third-party licensing conditions, or circumstances beyond reasonable control.

5. CLOSING & ACCEPTANCE

5.1 Closing Remarks

Thank you for the opportunity to present this proposal. We sincerely appreciate your time and consideration in evaluating our proposed solution.

ZENCORE SOLUTIONS LIMITED is committed to delivering a reliable, scalable, and business-focused Odoo ERP solution that supports your operational objectives and long-term digital transformation initiatives. We look forward to the opportunity to work closely with your organization and contribute to the successful implementation of this project.

Should you require any clarification or additional information regarding this proposal, please feel free to contact us using the details provided below.

5.2 Contact Information

Customer Contact (TEX WEAR FASHION)	
Primary Contact	Mohiuddin Ahmad,
